EXPERIENCE

AI/ML Intern

Machine Learning Intern

2025/12 – Present South Korea

- Built and curated computer vision datasets for person, vehicle, face, fire, smoke, violence, and fall-detection tasks.
- Developed automated annotation and preprocessing pipelines using YOLO, SAM, Qwen-VL, and custom tooling.
- Trained and evaluated detection models, improving data quality, class balance, and labeling efficiency.

Beton24 – Enterprise Resource Planning Solution

FullStack Developer

2023/06 – 2024/08 Uzbekistan

- Developed an ERP platform for construction material manufacturers, automating HR, accounting, production, and supply-chain operations previously managed through manual processes.
- Designed and implemented core system architecture, database schema, and major business modules using Yii2 and MySQL.
- Improved application performance through SQL query optimization, caching mechanisms, and Progressive Web Application (PWA) implementation.

Taskinmed – Solution for Medical Centers

Backend Developer

2023/01 – 2023/04 Uzbekistan

- Developed backend services for an Electronic Medical Record (EMR) platform used by medical centers to manage patient records and clinical workflows.
- Implemented real-time patient queue monitoring and notification features using FastAPI and WebSocket technologies.
- Built secure REST APIs and optimized database transactions and queries using SQLAlchemy ORM and MySQL.

PCCCRM – Professional Carpet Cleaning CRM

FullStack Developer

2021/08 – 2023/06 Uzbekistan

- Developed a SaaS-based CRM platform managing order processing, accounting, employee attendance, and delivery operations.
- Automated customer communication through SMS notification integration and workflow-driven business processes.
- Maintained and enhanced core application modules using Yii2, MySQL, and jQuery while supporting evolving business requirements.

TECHNICAL SKILLS

Python PHP FastAPI Yii2
Vue.js JavaScript MySQL
SQLAlchemy Machine Learning
YOLO OpenCV PyTorch
Scikit-Learn CNN Data Annotation
Data Preprocessing Model Evaluation
Git Linux Docker Nginx
REST API WebSocket

EDUCATION

B.Sc. in Computer Engineering

IT Covergence, Gachon University

September 2024 – July 2028

GPA: 4.42/4.5

SOFTSKILLS

Fast Learning Team Work Flexibility
Problem Solving Responsibility
Multi Tasking

LANGUAGES

English - IELTS Academic

Overall Band 6.5

04/2024 IDP Education

Korean - TOPIK

Level 3

11/2025 NIIED

Uzbek

Native
